THE SWEET HEAT

30gal drum and 250gal totes
now available on our website!

The Sweet Heat is a slow and steady move to warm and rich color! Apply at 1-2 g/a in your foliar program for a gradual increase in color and a soil firing energy feed. Combined with quality cultural practices and the resulting active soils, **The Sweet Heat** will contribute to the strengthening of your plant system!

Molasses forward blend!

- **Excellent microbial feed**
- **Promotes soil energy**
- **Increases organic decomposition**
- **Contributes to firmer surfaces**
- **Rich carbon source**

3% Ferrous Sulfate

- **Warm and rich color**
- **Enriched nutrient profile**
- **Increases nutrient cycling**
- **Improves mowing conditions**
- **Healthy and durable plants**

Priced to support your program and enhance soil and plant health on bulk acres!
