QUICK FACTS

SHAMROCK is one of the most aggressive bluegrasses available. It forms a sod so dense that it will crowd out most weeds. Shamrock exhibits early spring green-up and remains dark green and dense all season long. Shamrock is an excellent choice for home lawns, parks, or sod.

ADAPTATION

SHAMROCK was developed with quick establishment in mind. It is wear tolerant and repairs itself by rhizomes. Excellent for usage worldwide where other cool season grasses grow.
