THE SEA SUGAR

30gal drum and 250gal totes
now available on our website!

The Sea Sugar is the sweet delivery of a touch magnesium sulfate. Often tied up, supplementing magnesium supports photosynthesis on the way to healthy plants with vibrant color. The blended kelp improves stress tolerance and provides important plant hormones. Apply at 1-2 g/a in your foliar program for incredible plant benefits and a soil firing energy feed! Combined with quality cultural practices and the resulting active soils, **The Sea Sugar** will contribute to the strengthening of your plant system!

Molasses forward blend!

- Promotes soil energy
- Increases organic decomposition
- Rich carbon source

3% Magnesium Sulfate

- Boosts color pop
- Enriched nutrient profile
- Improved Chlorophyll quality

Kelp

- Enhances stress tolerance
- Healthy and durable plants
- Increases nutrient cycling

Priced to support your program and enhance soil and plant health on bulk acres!
