

Apple 3GL is one of the best performing perennial ryegrass varieties in the recent NTEP trial. Apple 3GL has extreme salt and cold tolerance, making it a great choice in northern climates where salt and snowmelt are used. Apple 3GL also has excellent drought tolerance, ranking in the top statistical category in the recent NTEP trial. In addition, Apple 3GL is gray leaf spot resistant allowing it to excel in any situation. Choose Apple 3GL and get a first-class ryegrass.

TOP RATED NTEP SALT TOLERANCE

TOP NTEP DROUGHT RESISTANCE

EXCELLENT GRAY LEAF SPOT RESISTANCE

SUPERIOR COLD TOLERANCE

TOP NTEP PERFORMER IN NORTH CENTRAL REGION

AREAS OF USE

- High-Traffic/Heavy Wear Areas
- Professional Sports Turf
- Tees & Fairways
- Sod Production
- Top-Quality Overseeding for Warm-Season Turf

SEEDING

Apple 3GL readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs/1,000 sq ft. Periodic reseeding at 3-5 lbs/1,000 sq ft maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs/1,000 sq ft is suggested for golf course greens. And 7-10 lbs/1,000 sq ft (300-450 lbs/acre) for tees, fairways and roughs.

MAINTENANCE

Apple 3GL will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of 1/2" and above.
