

2021 MAXIMUM PROTECTION SNOW MOLD FUNGICIDE PROGRAM

Powered by PCNB, the most effective snow mold fungicide available.

Nine years. 36 snow mold fungicide trials across the country. One fungicide combination has averaged over 96% control and has provided the most consistent performance year after year, trial after trial, especially in the highest disease pressure snow mold trials which are the true test of fungicide efficacy. **That fungicide combination of PCNB, chlorothalonil, and propiconazole is the Turfcide® 400 Maximum Protection Snow Mold Fungicide Program.**

The Turfcide 400 Maximum Protection Snow Mold Fungicide Program is recommended for use in areas where extended periods of continuous snow cover and extreme snow mold pressure commonly occur. If you want the best snow mold protection possible, whether you are in an area with extreme snow mold pressure or not, you will get it with the Turfcide 400 Maximum Protection Snow Mold Fungicide Program.

AMGUARD™ Environmental Technologies is so confident in Turfcide 400, and our Turfcide 400 Maximum Protection Snow Mold Fungicide Program, that we are offering the strongest performance guarantee in the turf industry. **You can count on at least 95% control of pink and gray snow molds for at least 160 days from our Turfcide 400 Maximum Protection Snow Mold Fungicide Program.**
