

Fastball 3GL is the next generation variety in a proven line of top performers. Fastball 3GL has excellent turf quality and is a top NTEP performer in all categories. Fastball 3GL has excellent gray leaf spot resistance and rated in the top statistical group in the recent NTEP trial. Fastball 3GL also has excellent crown rust resistance and improved cold tolerance, allowing it to be used in northern climates. Fastball 3GL is an excellent choice for your perennial ryegrass needs.

## EXCELLENT TURF QUALITY

## TOP RATED GRAY LEAF SPOT RESISTANCE

## TOP RATED CROWN RUST RESISTANCE

## TOP RATED COLD TOLERANCE

### AREAS OF USE

- High-Traffic & Heavy Wear Areas
- Professional Sports Turf
- Tees & Fairways
- Sod Production
- Landscape
- Residential Lawns
- Warm-Season Overseeding

### NTEP DATA

	Grey Leaf Spot Resistance	Turf Quality Sched. A	Fall Color	Winter Kill	Turf Quality Traffic
Fastball 3GL	8.0	6.2	6.7	5.7	6.1

LSD	1.5	0.7	1.1	2.7	1.1

2017 NTEP Perennial Ryegrass Trial Data Means. Ratings 1-9; 9=Best.

### SEEDING

Fastball 3GL readily establishes on loosened bare soil or after verticutting existing turf for renovation and overseeding. For typical new seeding applications, apply at a rate of 5-7 lbs/1,000 sq ft. Periodic reseeding at 3-5 lbs/1,000 sq ft maintains density for visual appearance and durability. For overseeding dormant warm season grasses, a rate of 30-40 lbs/1,000 sq ft is suggested for golf course greens. And 7-10 lbs/1,000 sq ft (300-450 lbs/acre) for tees, fairways and roughs.

### MAINTENANCE

Fastball 3GL will form a tight knit turf under a broad range of soil types and environmental conditions, from full sun to medium shade. It will mow cleanly at heights of ½" and above.
